

The following trees must not be planted within the street right of way of Harpers Ferry

Acer buergerianum (trident maple) – very prolific

Acer platanoides (Norway maple)

Acer pseudoplatanus (sycamore maple)

Ailanthus altissima (tree of heaven)

Bamboo

Elaeagnus angustifolia (Russian olive) – spread by birds

Elaeagnus umbellata (Autumn olive) – rapidly spread by birds

Morus (mulberries)

Paulownia tomentosa (princess tree)

Phellodendron amurense (Amur corktree) – very prolific; inhibits and suppresses regeneration of overstory canopy trees; no native predators

Pyrus calleryana (Callery pear) – escaping into forests

Quercus acutissima (sawtooth oak) – acorns very bitter, so not eaten by wildlife

Tetradium daniellii (Korean tetradium, beebee tree) – seeds spread by birds

Tilia cordata (littleleaf linden) – escaped from cultivation, prolific

Ulmus pumila (Siberian elm)
